

Aravind Santha

Ottawa, ON, aravindreddysanta@gmail.com, (343) 297-9424, <https://github.com/aravindsanta> <https://www.linkedin.com/in/aravind-santha-642929331/>

Full Stack and Mobile Developer

Qualifications

- Professional Software developer, with 3 years of hands-on experience building and publishing mobile apps for iOS and Android, Windows, Mac and Linux.
- Graduate of Algonquin College's Computer Programming program (Dean's List, June 2026) and creator of GradeUp Ontario, Can Cit, and MoodFrame, Ledge expense tracker — Four live apps on the App Store and Google Play, Windows built using Swift, SwiftUI, Flutter, C#, SQL and Supabase.
- Experienced in software testing, QA, database design, and working independently to deliver real products from idea to production.
- Strong verbal and written communication skills with the ability to translate between technical and non-technical audiences, with a focus on building practical software.
- Problem solving skills, self-directed, versatile, Adaptable, Pragmatic and possess a valid driver's license.
- Proficiency in Python development, troubleshooting, and application support.
- Familiarity with Linux-based operating systems, particularly Raspberry Pi OS or other Debian-based distributions.
- Comfort working with physical hardware including device assembly, imaging, configuration, cabling, packaging, and deployment preparation.
- Experience with UI frameworks
- Familiarity with lightweight web frameworks such as Streamlit, Flask, or FastAPI is considered an asset.
- Exposure to Microsoft Fabric, Azure, Microsoft Entra ID, Azure Storage, Power Platform and related Microsoft cloud technologies.
- Familiarity with APIs, networking fundamentals, remote device management, and Git-based workflows.
- Understanding of AI-assisted development workflows, prompt engineering, automation frameworks, and emerging technologies.
- Excellent organizational and time-management abilities, including balancing deployments, operational support, hardware preparation, and multiple concurrent initiatives.
- Comfortable balancing software development, operational support, hardware deployment, and partner-facing responsibilities.
- Pragmatic and solutions-oriented, with sound judgement regarding speed, quality, maintainability, and operational risk.
- Self-directed, adaptable, collaborative, and comfortable working in evolving technical environments.
- Demonstrates curiosity, accountability, ownership, and commitment to continuous learning.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, C#, PHP, HTML, CSS, SQL; Swift, SwiftUI, Dart/Flutter (familiar), TypeScript (familiar), REST APIs.
- **Frameworks & Tools:** React.js, Flutter, SwiftUI, Spring Boot, Laravel, Avalonia, Bootstrap, JUnit, XCTest, Postman, Selenium.
- **Databases:** MySQL, PostgreSQL, Oracle, MongoDB, Supabase, Neo4j, CloudKit.
- **Version Control & Deployment:** Git, GitHub, Xcode, App Store Connect, Google Play Console, Netlify, CI/CD pipelines.
- **Testing & QA:** Unit testing (JUnit, XCTest), end-to-end testing, App Store/Play Store release management, TestFlight, debugging, QA documentation, Quality Assurance, Packaging, End user support.
- **Operating Systems:** macOS, Linux administration, Windows, Scripting, Power apps.
- **AI tools:** Claude, Codex, antigravity and Curosor
- **IDE tools:** VS code, Eclipse, Visual Studio, Xcode, Android Studio
- **Other:** Networking Fundamentals, Technical documentation, Artificial Intelligence, Emerging Technologies, Develop Solutions, Packaging, Fleet Management, Post man.

WORK EXPERIENCE

Full Stack and Mobile Developer – Temagami Software Inc., Ottawa, ON

Sept 2024 – Present

- Collaborate with internal teams, communicate technical concepts clearly to non-technical stakeholders, and provide cross-coverage with the second Solutions Developer across hardware, software, and field deployments.
- Partner directly with business stakeholders to scope, build, and support lightweight applications, automations, AI agents, operational tools, integrations, and reports — including four published mobile/desktop apps (iOS, Android, Windows) built end-to-end from requirements through deployment.
- Leverage AI coding assistants such as Claude, GitHub Copilot, ChatGPT, and similar technologies to accelerate development, testing, troubleshooting, and iteration cycles.

- Develop solutions using technologies such as Python, Streamlit, Flask, FastAPI, Power Apps, and Power Automate, alongside Angular/TypeScript, Flutter/Dart, and Swift/SwiftUI for client-facing applications.
- Rapidly deliver working solutions, gather stakeholder feedback, and iteratively refine functionality — applying this cycle to production apps integrating Supabase REST APIs, PostgreSQL, Stripe, RevenueCat, and AdMob.
- Support workflow improvements and operational efficiencies through scripting, automation, and AI-assisted tooling, including CI/CD pipelines built with GitHub Actions and deployed via Netlify.
- Exercise sound judgement regarding solution quality, scalability, maintainability, security, and operational support requirements, including Row-Level Security (RLS) policies on Supabase-backed APIs and SQLite schema design for offline-first applications.
- Provide ongoing support, maintenance, troubleshooting, and enhancement activities for internally developed tools and automations, as well as published consumer applications post-launch.
- Recognize when solutions have expanded beyond the intended scope of the team and require transition into formal project delivery or enterprise ownership.

Pharmacy Assistant – CareRx, Ottawa, ON

Dec 2023 – Aug 2024

- Prepared prescriptions and managed records using Kroll software.
- Gained transferable skills in data accuracy, documentation, and process compliance.

Clinical Research Associate – Biolytical Laboratories, Vancouver, BC

Dec 2021 – Aug 2022

- Supported clinical research studies and data collection processes in a regulated laboratory environment with strict attention to documentation accuracy and protocol compliance.
- Developed strong regulatory awareness, research methodology skills, and attention to detail — skills directly applicable to software QA and data validation work.

TECHNICAL PROJECTS

GradeUp Ontario – iOS & Android App – Flutter, Dart, Swift, SwiftUI, Supabase, RevenueCat, AdMob

Sept 2025 – Dec 2025

- Built and published a full Ontario student quiz app on the App Store and Google Play; integrated Supabase REST API backend for authentication, user data, and content management.
- Integrated RevenueCat for in-app subscriptions and AdMob for monetization; implemented account deletion, Firebase-to-Supabase migration, and App Store compliance fixes.
- Owned full product lifecycle: architecture, UI/UX, backend integration, QA testing, TestFlight beta, and App Store/Google Play release management.

Can Cit – Canadian Citizenship Test Prep App – Flutter, Dart, Supabase, iOS & Android

Dec 2025 – Jan 2026

- Published a bilingual Canadian citizenship exam prep app for iOS and Android with multi-language support, premium content gating, and in-app purchase flows.
- Built Supabase backend with Row Level Security for multi-user data isolation; resolved App Store and Google Play policy rejections through compliance fixes and store asset redesign.
- Integrated REST APIs, Stripe payment processing, and CloudKit data sync; managed full app lifecycle across both platforms from development to production.

MoodFrame – Daily Mood Tracker App – Swift, SwiftUI, CloudKit, iOS

Jan 2026 – Mar 2026

- Built a native iOS daily selfie mood tracker using SwiftUI with CloudKit for private cloud-backed data storage and sync across a user's Apple devices.
- Implemented camera integration, local notifications, and Core Data persistence; published on the App Store with a polished UI following Apple Human Interface Guidelines.

Ledge Expense Tracker- C#, Sql, Avalonia

April 2026-June 2026

- A free, offline-first expense tracker for desktop — one codebase, running natively on Windows and iOS, with Linux on the way.
- Built using Avalonia framework for cross platform by keeping privacy in mind.

EDUCATION

Computer Programming – Dean's List

Sept 2024 – June 2026

Algonquin College, Ottawa, ON

Master's Degree in Pharmacology

Feb 2012 – Mar 2013

University of Bedfordshire, Luton, United Kingdom

Bachelor's Degree in Pharmacy

Mar 2008 – Jan 2012

JSS University, Mysore, India

CERTIFICATIONS

- Agile Software Development: Clean Coding Practices – LinkedIn Learning (2025)
- Software Testing Foundations: Testing throughout the SDLC – LinkedIn Learning (2025)
